CINAHL[®]

全球最高品質和最全面的護理和專職醫療保健期刊索摘，
還包括世界上最珍貴的全文期刊

CINAHL[®] *Complete*

全球最高品質、最全面的
護理學及綜合醫療保健類期刊索引，
還包括全球最具價值的全文期刊專輯

Cumulative **I**ndex to **N**ursing and **A**llied **H**ealth **L**iterature

CINAHL 索摘資料庫遠比其他護理類和綜合醫療保健類資料庫內容全面

- CINAHL 是最全面的索摘資料庫，包含全球護理學和綜合醫療保健類期刊的權威索摘
- 收錄 5,500 多種護理學和綜合醫療保健類期刊索摘
 - 包含其他附屬學科領域，支援護理和醫療專業實務（如：生物醫學、衛生服務管理、公共衛生等）
- 其他同類型資料庫收錄的索摘不夠全面，而是主要基於出版社提供的全文期刊提供期刊索摘

CINAHL收錄的索摘品質在護理和綜合醫療保健類資料庫中無與倫比

- 索摘編寫由非常頂尖的醫學索引編寫人員完成
- 詞彙按照最相關到最不相關的順序排列，並由搜尋引擎進行評估
- 主標題和副標題區分清楚，由搜尋引擎進行評估
- 擁有用於護理和綜合醫療保健研究的權威控制詞彙，由搜尋引擎進行評估
- 其他同類型資料庫無法提供可比較的索摘

使用基本的布林邏輯And Or Not幫助搜尋

布林邏輯 (Boolean Operators) 的運作方式

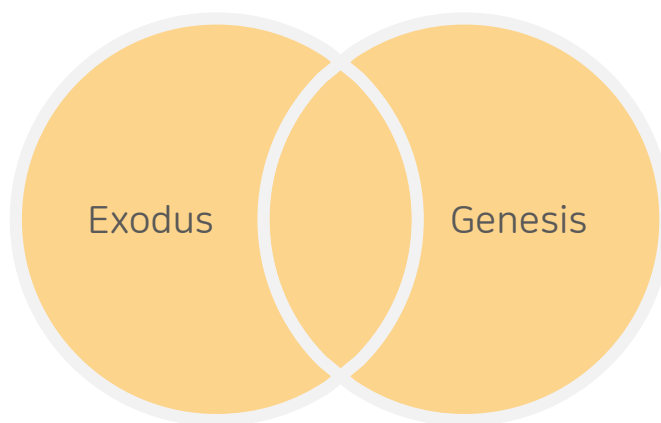

AND

Exodus and Mission

AND 就是要把這二個概念相結合

OR

Exodus or Genesis

OR 所要檢索的是只要有包含這二個概念的其中一個

NOT

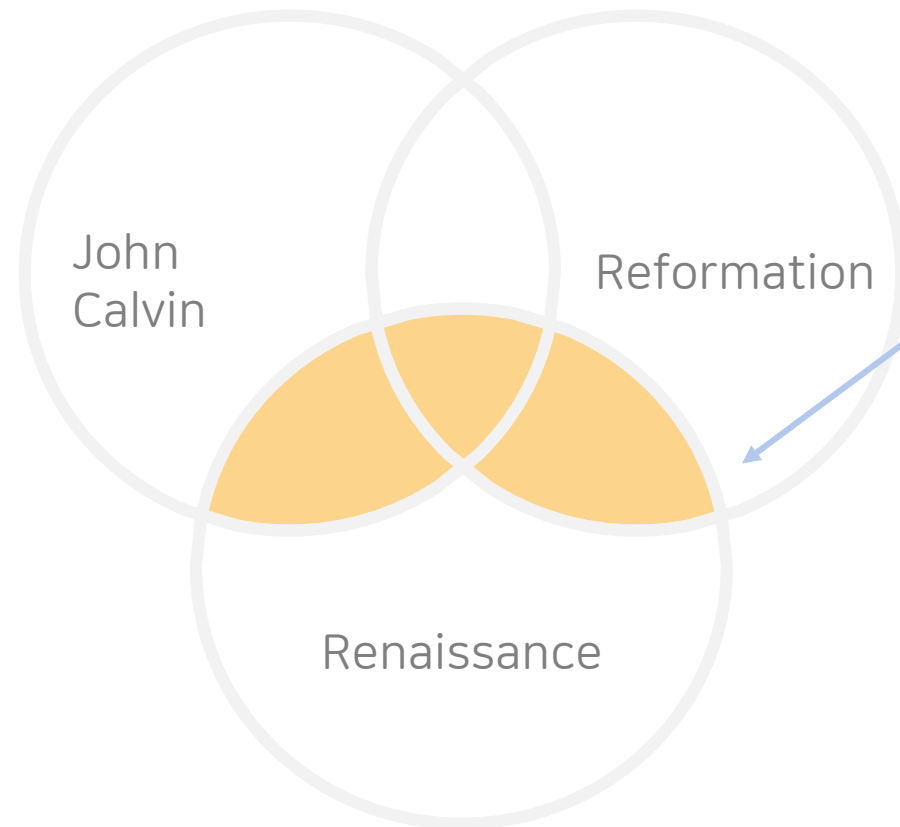

Genesis not Adam

NOT 是要去除不希望在搜尋結果出現的字詞

布林邏輯 (Boolean Operators) 的運作方式

e.g. 想查找文藝復興時期的喀爾文或宗教改革研究

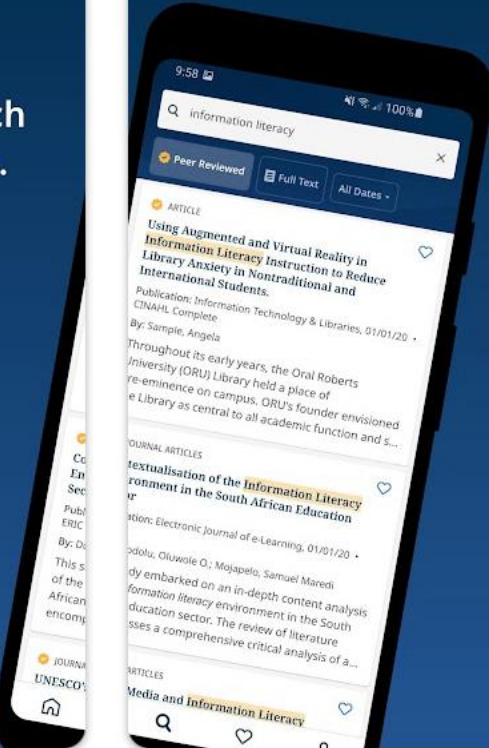

(John Calvin or Reformation) and Renaissance

使用括號 () 對多個關鍵字進行分組，以獲得更準確和特定的布林邏輯組合

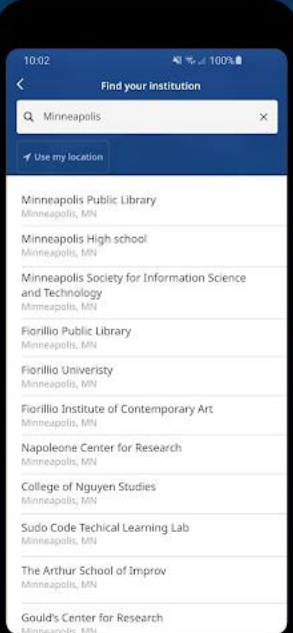

透過檢索式優化搜索

搜尋範例 Scenarios

小明因為貧血常頭暈，醫生說要多吃高鐵的食物才會補血。

所以小明坐高鐵都吃兩個便當，貧血狀況改善很多了。

臨床情境 Scenarios

您是有執照的護理師(Registered Nurse)在泌尿科病房服務。您有一位病人是55歲的男性剛接受腹部手術後正在恢復中(腹腔鏡攝護腺切除術)。這名病患抱怨他的腹部疼痛且感到噁心。他有腹漲、無腸蠕動聲。醫生根據臨床表徵與影像懷疑是麻痺性腸阻塞。

您打算在下一次的實證護理實務委員會會議上討論此案例。委員會決定做一項案例研究，以確定是否有證據表明，手術後如嚼口香糖等簡單的介入，是否可以預防腹部手術後的術後腸阻塞。

基於此臨床情境，我們的研究問題是：在病人經歷過腹部手術後，是否有證據可以比較有嚼口香糖與未嚼口香糖對於術後腸阻塞的影響？

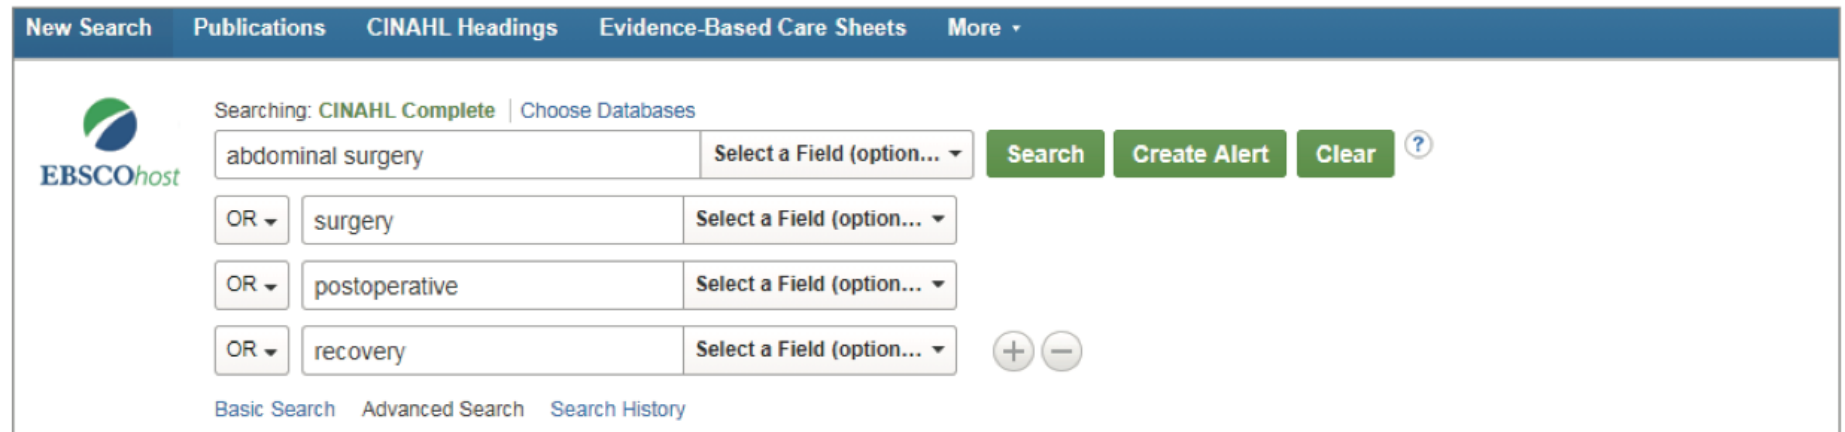

PICO 元素	關鍵字 KEYWORDS	關鍵字 SEARCH TERMS	檢索策略 SEARCH STRATEGIES
P (病人或母群體 Patient or Population)	Patients undergoing abdominal surgery (經歷過腹部手術後的病人)	Abdominal Surgery	Abdominal surgery OR Surgery OR Postoperative OR Recovery
I (介入 Intervention)	Chewing gum (有嚼口香糖)	Chewing Gum	Chewing Gum OR Gum
C (對照 Comparison)	Not chewing gum (未嚼口香糖)		
O (結果 Outcome)	Affects post-operative ileus (對於術後腸阻塞的影響)	Postoperative Ileus	Postoperative Ileus OR Paralytic Ileus OR Ileus

執行檢索之前

在您檢索之前，您會想確認檢索模式是否設定為布林邏輯/詞組。需要如此做的原因在於此選項允許精確的詞組進行檢索。例如:如果您搜尋詞組 Heart Disease 系統將會搜尋 Heart and Disease 一起出現的紀錄，像是一個片語，而不是分開的兩個單獨的字。

要開始檢索前，請先參考上表。每一個PICO字母，都代表一次單獨的檢索。

- **P (病人或母群體 Patient or Population):** 從受過腹部手術的病人或群體開始進行檢索。如上述所提及的，為了增加您的檢索結果，請減少使用描述性用語，精煉成相同含義如Surgery、Postoperative 或 Recovery。註:請確認使用布林邏輯「or」，這樣每個結果至少會包含一個這些檢索用語。
- **I (介入 Intervention):** 進行到I (介入)的時候，請重開始一個新的檢索，嚼口香糖或口香糖(Chewing Gum or Gum)。記得使用布林邏輯「or」。
- **O (結果 Outcome):** 您現在可以繼續搜索結果(Outcome)，即術後腸阻塞(post-operative ileus)。增加同義詞麻痺性腸阻塞(paralytic ileus)或術後腸阻塞(ileus)。您的目標是確定術後嚼口香糖是否會對術後腸阻塞產生正面或負面影響。

The screenshot displays the EBSCOhost search interface. At the top, there is a navigation bar with links: New Search, Publications, CINAHL Headings, Evidence-Based Care Sheets, and More. The main search area features the EBSCOhost logo on the left. The search bar contains the text 'abdominal surgery'. To the right of the search bar are buttons for 'Search', 'Create Alert', and 'Clear', along with a help icon. Below the main search bar, there are three rows of Boolean search terms: 'OR surgery', 'OR postoperative', and 'OR recovery'. Each row has a dropdown menu labeled 'Select a Field (option...)'. At the bottom of the search area, there are links for 'Basic Search', 'Advanced Search', and 'Search History', and a plus/minus icon.

醫護文獻搜尋 與AI利用

PICO之外，以 EBSCO CINAHL 為例

EBSCO

Information Services

說明

AI 時代來臨，在做醫護文獻搜尋時，如果能搭配**AI**來做使用，同時避免**AI**容易有的幻覺問題，相信研究會進行的更順利，本範例省略常用的PICO，直接利用資料庫的新功能，將研究問題進行搜尋，並用**AI**分析結果。

使用資料庫：CINAHL, Medline 醫護資料庫（不限版本）

使用**AI**：Copilot（公司使用權限）

護理學校的導師正在進行一項研究，主題是透過音樂介入來幫助護理系學生進行壓力管理。老師希望聚焦於由護理人員主導的方法，而非由治療師主導的方法），以下是護理學校導師的筆記：

領域一（介入方式）：音樂治療、音樂介入、音樂療法

領域二（壓力相關）：壓力、壓迫、緊張、焦慮、痛苦、不安、坐立不安、憂鬱、壓力源

領域三（研究對象）：護理系學生、學生護理師、護理本科生、初階學生

領域四（研究結果）：減少、降低、改善、減輕、因應

Our nursing school tutors are conducting a research regarding stress management for nursing school students using music intervention. (they would like to focus on the nurse-led approach but not the therapist approach). Here is the notes from our nursing school tutors:

Domain 1 (invention) : music therapy or music intervention or musical therapy

Domain 2 : Stress or pressure or strain or anxiety or distress or nervousness or restless or depression or stressor

Domain 3 (Population) : nursing students or student nurses or undergraduate student nurses or junior students

Domain 4 (outcome) : Reduce or decrease or improve or diminish or coping

Issue:

Abstract: • Simulation-based learning experiences (SBLE) in nursing education are evolving with a focus on skill transfer, patient safety, and measurable outcomes.

• Anxiety is a substantial challenge for nursing students during simulation testing, but research-based music listening has been shown to have a substantial anxiolytic effect.

• Guided by Bandura's Social Cognitive Theory, a 15-minute music-listening intervention found reduced anxiety, increased self-efficacy, and enhanced performance among nursing students in simulation-based assessments. Anxiety can negatively impact nursing students' confidence and performance during simulation-based training, leading to suboptimal learning outcomes. The study included 102 prelicensure Bachelor of Science in Nursing (BSN) students. The participants (μ age = 21.72, SD = 3.14), mostly female ($n = 85$, 83.33%) and Caucasian ($n = 67$, 65.69%), were randomized into control ($n = 51$) and experimental ($n = 51$) groups. Participants in the control group prepared for simulation as they usually would, while those in the experimental group listened to 15-minutes of classical music before their simulation sessions. Anxiety, self-efficacy, and instructor-assigned performance ratings during the simulation were evaluated. The experimental group experienced significantly lower anxiety, increased self-efficacy, and higher performance scores compared to the control group (p -values $< .001$ for all measures). These results suggest that a 15-minute music-listening intervention could effectively reduce anxiety, boost self-efficacy, and improve performance during simulation-based training.

接著使用**Copilot**，將**PDF**上傳後，輸入中文指令（可自由發揮）

護理學校的導師正在進行一項研究，主題是透過音樂介入來幫助護理系學生進行壓力管理。老師希望聚焦於由護理人員主導的方法，而非由治療師主導的方法，請問PDF檔案中哪些文獻符合老師的研究需求？

根據您提供的PDF檔案內容，老師希望聚焦於「由護理人員主導」的音樂介入方法來幫助護理系學生進行壓力管理，而非由音樂治療師或其他專業治療師主導的方式。以下是符合這個條件的文獻：

✓ 符合條件的文獻（由護理人員主導的音樂介入）

1. Efficacy of 15-minute music intervention on nursing students' anxiety, self-efficacy, and performance in simulation testing: A randomized study
 - 作者群：多位護理教育者與研究者
 - 介入方式：學生在模擬測驗前聆聽15分鐘古典音樂
 - 主導者：由研究團隊（非音樂治療師）設計與執行
 - 結果：顯著降低焦慮、提升自我效能與表現
 - ✓ 完全符合老師需求
2. Music for Anxiety Reduction and Performance Enhancement in Nursing Simulation
 - 介入方式：模擬測驗前的音樂聆聽
 - 主導者：由護理教育者設計與執行
 - 結果：降低焦慮與生理指標，提升表現
 - ✓ 符合老師需求
3. Effect of Listening to Music on Anxiety Levels of Nursing Students During Their First Experience with Intravenous Catheterization
 - 介入方式：學生在靜脈注射練習時聆聽音樂
 - 主導者：由護理學校教師安排

經由Copilot分析，節省閱讀文獻的時間，同時避免AI的幻覺

Nursing interventions to *reduce* mental health problems in *nursing students*: a scoping review.

- 該評論確定了各種心理干預，例如積極心理治療和以正念為基礎的壓力減輕，這些措施表明在減輕護理學生的抑鬱，焦慮和壓力的症狀方面有效。
- 研究了多種培訓方法，包括決心訓練、音樂治療和笑聲治療等，強調了量身定制的方法來滿足護理學生獨特需求的重要性。
- 數位技術與社會支援系統的整合，成為促進護理學生心理健康的重要組成部分。
- 學習環境和心理健康意識被認為是影響護理學生心理健康的重要因素。
- 回顧顯示了幾個研究差距，包括需要進行縱向研究、人口變數的探討，以及評估心理健康介入護理教育課程中的整合情況。

Nursing interventions to reduce mental health problems in nursing students: a scoping review

Iyus Yosep^{1*}, Rohman Hikmat², Ai Mardhiyah³, Asroful Hulam Zamroni⁴, Yodha Pranata⁵ and Rizky Lukman Saputra⁵

Abstract

Backgrounds Mental health problems among nursing students are becoming an increasingly pressing concern, given the high levels of stress and academic pressure they face. Nursing students are more susceptible to mental health challenges such as anxiety, depression, and burnout. Therefore, various interventions aimed at addressing these issues need to be further explored and mapped.

Objective This study aims to identify and map various interventions that have been implemented to address mental health problems among nursing students.

Methods This study used a scoping review design, with articles retrieved from four databases: Scopus, PubMed, Web of Science, and CINAHL. Keywords used in the search included "nursing students," "interventions," and "mental health." Inclusion criteria comprised original research articles that discussed interventions without a comparison group, published in English, and within the last 10 years (2015–2025). Data were manually extracted using tables and analyzed using descriptive qualitative methods.

Results A total of 12 articles met the inclusion criteria, presenting a variety of interventions such as peer support programs, coping skills training, and mindfulness-based therapies. Findings indicated that these interventions were associated with reduced anxiety levels and improvements in the psychological well-being of nursing students. Themes that emerged from the analysis included the contribution of social support, the role of skill development, and the relevance of a holistic approach in addressing mental health concerns.

Conclusion Interventions targeting mental health concerns in nursing students have shown promising outcomes in promoting psychological well-being. Further research is recommended to explore more innovative and context-specific interventions tailored to the unique needs of nursing students.

Keywords Intervention, Mental health, Nursing, Students

減少護生心理健康問題的護理干預：範圍界定綜述

Iyus 約塞普¹ Rohman 智慧 艾瑪瑪律迪亞² Asroful Hulam³ Zamroni⁴ Yodha 和坦茲基·盧克曼·薩普特拉⁵

摘要

背景 鑒於護理學生面臨的高壓力和學業壓力，他們的心理健康問題正成為一個越來越緊迫的問題。護理專業的學生更容易受到焦慮、抑鬱和倦怠等心理健康挑戰的影響。因此，需要進一步探索和繪製旨在解決這些問題的各種干預措施。

目的 本研究旨在確定和繪製為解決護生心理健康問題而實施的各種干預措施。

方法 本研究採用範圍界定綜述設計，文獻檢索自Scopus、PubMed、Web of Science和CINAHL4個資料庫。搜索中使用的關鍵字包括「護生」、「干預措施」和「心理健康」。納入標準包括討論沒有對照組的干預措施的原創研究文章，以英文發表，以及在過去10年（2015-2025年）內發表。使用表格手動提取數據，並使用描述性定性方法進行分析。

結果 共有12篇文章符合納入標準，提出了同伴支持計劃、應對技能訓練、正念療法等多種干預措施。研究結果表明，這些干預措施與降低焦慮水準和改善護理學生的心理健康有關。分析中出現的主題包括社會支持的貢獻、技能發展的作用以及整體方法在解決心理健康問題方面的相關性。

結論 針對護生心理健康問題的干預措施在促進心理健康方面顯示出可喜的效果。建議進行進一步的研究，以探索針對護理學生獨特需求的更具創新性和針對具體情況的干預措施。

關鍵詞 干預、心理健康、護理、學生
